Your Seventh Lawn Application

The final application of the season applied today will provide nutrients for the lawn to store allowing for a healthier lawn next Spring. Broadleaf weeds were treated if present. This application does not need to be watered in since it does not contain an insecticide or pre-emergent.

Fall Aeration

If you have not yet scheduled your lawn to be aerated, you still have time! Aerations will be done until the ground freezes. All lawns will benefit from the increased air, water, and nutrient movement in the root system the aeration promotes.

Low-Voltage Lighting

Let Granulawn shed some light on your home every night! Granulawn only uses professional products from Kichler and Vista. Not only will landscape and deck lighting beautify your property, it will increase your home's value and security.
